                                                                                                                                                                                                                                                                                        This protein is a transcriptional regulatory protein.

This protein mediates biochemical and toxic effects of halogenated aromatic hydrocarbons.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             #authors Laurent, B.C.; Treitel, M.A.; Carlson, M.

/note="Vector: pSPORT1; Site_1: Mlul; Site_2: Not1; mRNA was prepared from human testis of a 27 years old man. CDNA was prepared throw human testis of a 27 years old man. CDNA was prepared using a 15mer oligo dT anchored by two degenerated bases at its 3'end and containing a Not1 site at its 5'end. The CDNA was cloned between Sall and Not1 sites of pSPORT1. The Mlul·Sall fragement come from the adaptator used for the cloning. The 3' end is at the Not1 site. CDNA corresponding to abundant species were eliminated from this library." 2 others

/clone_lb="restis of a 27 years old man. cDNA was prepared from human testis of a 27 years old man. cDNA was prepared using a 15mer oligo dT anchored by two degenerated bases at its 3'end and containing a NotI site at its 5'end. The cDNA was cloned between Sall and NotI sites of pSPORIL. The Miul.Sall fragement come from the adaptator used for the cloning. The 3' end is at the NotI site. cDNA corresponding to abundant species were eliminated from this library. I others

//orde="Vector: pSPORTI; Site_1: Mlu1; Site_2: Not1; mRNA
was prepared from human testis of a 27 years old man. cDNA
was prepared using a 15mer oligo dr anchored by two
degenerated bases at its 3'end and containing a Not1 site
at its 5'end. The cDNA was cloned between Sall and Not1
sites of pSPORTI. The Mlu1. Sall fragement come from the
adaptator used for the cloning. The 3' end is at the Not1
site. cDNA corresponding to abundant species were
eliminated from this library."

Email: guellaen@infoblogen.fr
This sequence derives from a clone which was selected from the cDNA
library - Testis 5 - using a repeat of 14 CAG as probe
Seq primer: M13 reverse.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       T77368 464 bp mRNA EST 15-MAR-1995 yd72g08.rl Soares fetal liver spleen 1NFLS Homo sapiens cDNA clone IMAGE:113822 5', mRNA sequence.
